

SH-70B – Hydraulic Steel Punch - Features

Punches up to 20.5mm round holes in 13mm thick mild steel plate in seconds

Much faster than drilling or rota broaching – saves on labour costs

Recommended for angle iron, plates, beams & busbars

Guided piston enables punching of slotted holes

Portable - great for construction, maintenance or service applications

Strong forged steel C frame – made in Japan – same unit as we hire

Comes complete with four punch & die sets

Large top mounted carry handle for easy punch positioning

Dual action spring loaded stripper holds material during punching & strips material from punch on return – scribe lines on stripper aid in locating punch

12 month warranty backed by HTC's in-house workshop

Full range of common round punch sets & spares carried by our workshop

Technical Specifications

Weight - 13kg (punch unit only)

Dimensions - 360 (H) x 210 (W) x 95 (D)mm
