DC-20W

DC-20Wxx Rebar Cutter

The DC-20 cutters are very popular, heavy-duty tools for general use. Whichever you choose, the basic DC-20WH, the double insulation DC-20HL or the lighter, side-handled DC-20W, you can rely on its 15 tons of pressure to cut a 20mm (3/4") 650N/mm² tensile strength rebar in 3 - 4 seconds. All three models have newly developed balanced armatures and specially hardened pistons for long life.
