

"Makin' the Hard Jobs Easy"

ELECTRIC BLOWER BOX KIT

This high volume, low pressure blowing system is used to blow a balloon type bag attached to a draw line or string through conduits. The draw line is then used to pull a heavier hauling rope back to your start position. This system can easily rope a 100mm conduit 300-500 meters. Dual stage motors with max 3.5 cfm.

Power : 240v

KIT INCLUDES:

1 x BLOWER EBK2-1300

5m x 50mm hose EBP-5M50

Hand-Gun EBH-30

Conduit Seal-Offs: ECS-12, 50, 110

3 x rope grommets: 3mm, 5mm and 7mm

EBK2-1300, Electric Power Blower

2 stage electric blower.

1300w electric motors delivering approximately 3.5 cubic meters of air per minute.

Pressure Roping Equipment

The high pressure roping system is the system of choice when long distances of conduit or sub duct require a draw line to be installed. A standard compressor of around 175cfm or less is suitable for this job. The rubber seal offs are compressed inside the end of the conduits to avoid blow back and if further grip to the conduit is required additional rubber seal offs can be added to increase the hold on the ID of the conduit due to back pressure created with distance and water head pressure. Hand gun is complete with stainless steel ball valve, type-B connector and 3 x rope grommets to suit 3, 5 and 7mm draw lines. The connecting claw to the compressor hoses has the required safety feature for the locking clips. There are a series of seal offs ranging from 40mm to 200mm whilst large can be manufactured upon request
