FEATURES

The new powerful magnetic motor with high torque offers superior performance to the REC-54.

They were specifically designed for cutting the toughest copper and aluminum cables in a limited amount of space. Cuts are clean with minimal cable distortion and comfortably fits into a gloved hand. Repetitive ratcheting movement is entirely eliminated. Just a squeeze of the rocker arm trigger is all it takes to cut.

This powerful gear reduction motor pulls a movable blade through tough copper cable.

They are equipped with an electronic circuit for overloading protection.
