

HY-Air

HYTORC's innovative air-powered hydraulic pumps are the most reliable pneumatic pumps on the market. These systems are ideal for use within explosive environments or in areas where electricity is unavailable through the use of a portable air compressor.

About the Pump

20.01

This 3-stage pump is designed to reduce cycle time for improved productivity. The compact design is lightweight for improved mobility and available with one or two-gallon reservoir.

Pump Features

20.02

Air Consumption
3800 cu.in/sec

Data Recording
NO

Gauge
0-10K PSI (+/-1% Acc.)

Reservoir Capacity
2 gal.

Stages
3

Max Flow Rate
770 cu. in/min

Weight
46.3 lbs
